

# ECO SHUTTLE LAUNCH: ANOTHER JEC FIRST

Bashni Linghan, Eco Shuttle CEO, and Craig Newman Johannesburg Expo Centre CEO

The JEC has launched a new on-site shuttle service for any of its exhibitions, conferences and events organisers, as well as their delegates, exhibitors and visitors who require safe, reliable and prompt transportation services.

As one of Southern Africa's leading national and international events venues, the Johannesburg Expo Centre (JEC) is pleased to announce an exciting new partnership with Eco Shuttle Service, a dynamic and innovative transfers and transportation services provider, which values the importance of personalised services.

In South Africa, no one can underestimate the importance of safe and reliable transportation, with its significant impact on our local economy. "We are constantly looking at new and innovative ways to broaden the JEC's exceptional range of services, and we are pleased to welcome Eco Shuttle Service; a young, dynamic and empowered company, as a long-term services partner," says Craig Newman, the CEO of Johannesburg Expo Centre. "All delegates who are attending any event at the JEC will have complete access to a full range of shuttle services, in a vehicle that suits their specific requirements, throughout the duration events hosted at the JEC," he added.

Mr Newman goes on to say that it's a fact that reliable transport is one of the most important factors for economic progress. In fact, in many ways it's an economic lifeline,

where speed, efficiency and safety are critical to economic growth. South Africa has faced its own share of challenges in this regard. The ongoing conflict between the metered taxi industry and the global ride hailing service, Uber, have raised concerns around safety and reliability. "In the meantime, we are committed to providing our clients and stakeholders with an excellent service with a partner who we believe will make a positive impact," says Mr Newman.

Eco Shuttle Service is a young and innovative company focusing on old-school values and good service.

The company is committed to tailoring transport requests and catering for special requests to suit each client's personal needs. As a company servicing the greater Johannesburg, Pretoria, and Mpumalanga regions, Eco Shuttle Services takes great pride in its range of vehicles, which are always in impeccable condition. With a range of medium to high-end sedans, and larger vehicles to accommodate groups of people, Eco Shuttle Service is also dedicated to upholding environmental concerns, and using vehicles with the lowest possible carbon emissions. Eco Shuttle's range of services include: Airport Transfers, Hotel Pick-up & Drop-offs, Events / Conference Shuttle, Gautrain Station Shuttle and Chauffeur Drive.

The JEC has also been one of the leading venues that has contributed towards the remarkable growth and development of South Africa's exhibitions,

conferences and events industry, earning a formidable reputation as a world-class facility that offers exhibitors, visitors and delegates a first-rate experience.

Mr Newman goes on to say that JEC will continue looking at innovative ways to add versatility and service excellence, not only at the JEC, but as a member of the exhibitions, conferences and events industry in Southern Africa.

"Our greatest priority is to maintain our position as one of Southern Africa's leading national and international exhibition, conference, convention and events centres," says Mr Newman. "We do this by harnessing our professionalism, flexibility and hospitality to offer our clients world-class service; and to ensure that their experience always exceeds their expectations," he concluded.
